강연제목: '의공학자를 위한 의료기기 개발과정부터의 사용적합성 고려'(Consideration of Usability from the Development Process for Biomedical Engineer)

Abstract:

Medical devices have unique characteristics that distinguish them from general consumer products, and they must comply with medical device laws specific to each country. The concept of usability is being introduced as part of regulatory requirements in different countries. Beyond regulatory demands, there are several reasons why usability characteristics must also be considered. This study aims to review the well-established usability systems for medical devices and identify the appropriate ways to apply them for biomedical engineers.

Brief Biosketch

Bachelor: Biomedical Engineering, Yonsei University

Master: Medical Device Engineering and Management, Yonsei University

Jul. 2009 ~ present: Department of Medical Device Development Support

2023.01 ~ 현재 대한의료기기사용적합성연구회 총괄간사

2015.03 ~ 현재. 의료기기사용적합성 실무자 업무

2018.11. ~ 현재. 한국의료기기안전정보원 표준교재 개발자

2022.06. ~ 현재. 인간공학기사

2022.08. ~ 현재. 한국보건산업진흥원 의료기기컨설팅트

2023.11. ~ 현재. 국민건강보험공단 자문위원
